Reasons For Allowance

1. The following is an examiner's statement of reasons for allowance:

The independent claims 1 recites "said liquid crystal panel control device and said organic EL panel control device control said driving on the basis of the driving frequency supplied by said frequency supply device" same as claim 10. The independent claims 4, 6, 13, 15 all recite the limitation driving method and driving voltage. None of the references, either singularly or in combination discloses AC driving voltage and frequency driving voltage as recited in claims 1 and 10 and the driving voltage and the common or selected driving method in light of the specification (i.e. frequency driving or duty ratio driving method) as recited in claims 4, 6, 13 and 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lebby et al (U.S. Patent No. 6,069,593) is cited to teach different display panels such as LCD (26) and organic electroluminescence (28) connecting AC power supply (58), but does not teach a voltage supply is controlled by common or selected driving method as described in the specification (i.e. frequency, duty ratio) .
